|---------------------------|------------------------------------|---------------------------|
| ▪ Analytical Skills       | ▪ Troubleshooting                  | ▪ Multi-tasking           |
| ▪ Customer Service        | ▪ Relationship Building            | ▪ Strong Work Ethic       |
| ▪ Automation              | ▪ Collaboration & Teamwork         | ▪ Fast & Efficient Worker |
| ▪ Management & Planning   | ▪ Exceptional Interpersonal skills | ▪ Customer Relations      |
| ▪ Creative Problem Solver | ▪ Innovative Solutions             | ▪ Highly organized        |
| ▪ Process Improvement     | ▪ Dedicated to Excellence          | ▪ Communication Skills    |

## TECHNICAL SNAPSHOTS

C#, Selenium scripting (Not Ide) with remote execution using Selenium Grid, Appium, Elastic Search, Log Stash & Kibana (ELK), Kafka, PowerShell, Bash scripting, SoapUI, Postman & Postman Automation, Java (postman & JMeter scripting), Swagger, JMeter & Load Testing, TeamCity, Visual Studio and VS Code, SQL & SQL Prompt, MongoDB, Complex Event Processing (CEP) & Micro Services, Front and Backend automation (with reporting), Azure Dev Ops, GitLab, TeamCity, OctopusDeploy, VM's, .NetCore, RabbitMQ, Nunit/Unit Testing, Python, TypeScript, Confluence, JIRA, CRM Dynamics 365, Power Platform, Azure Functions & LogicApps, Azure Storage, App Insights, Playwright, MVC & Razor Pages, AKA .Net

## CORE QUALIFICATIONS

**Training:** Formulating Material, Facilitating and Conducting of Formal and Informal Technical Training

**Coaching & Mentoring:** Idealized Influence, Individualized Consideration, Intellectual Stimulation, Inspirational Motivation

**Recruitment:** Screening (Telephonic), Testing, Interview & Selection

**Netiquette:** Rules of Etiquette Applicable to Cyber Space

**Communication:** Very Strong Written, Verbal, Non-Verbal Communication

**Customer Relations Management (CRM):** Building Long Term Profitable Relationships with Human Capital/Customers through Effective Communication and Service Delivery

**Quality Management:** Planning and Organizing People, Systems and Processes to ensure TQM

**Technologies:** Understanding the technologies, databases, architecture, network infrastructure and scripting languages used by the Technology Teams

## PROFESSIONAL EXPERIENCE

### Test Architect (CRM D365)

Mar 2022 - present

Digi Outsource (Betway Division)

- Collaborating with test, Infrastructure, DevOps, and development team members on application & testing architecture, to ensure that the approaches and technologies applied to the current implementation are sound and fit for purpose.
- Design / architect and implement regular robust full build / deploy / test automation process across both web and windows-based product teams.
- Provide technical leadership and guidance to members of the test team.
- Empower employees to take responsibility for their jobs and goals. Delegate responsibility and expect accountability and regular feedback.
- Analyzing competitive products and technologies with appropriate suggestions (may use demos, POC's) to influence product / technology direction.
- Pro-actively analyzing current processes and practices with the ability to drive improvements.
- Take responsibility for test infrastructure including environments and software, liaising with teams such as DevOps in areas such as CI/CD.
- The ability to monitor the effectiveness of the testing function as a whole and bring about improvements through insights gained via analysis at all stages of the SDLC/STLC.
- Implementing the definition, selection and extension of the test automation architecture and strategy

**QA Technical Lead (CRM D365)****Apr 2021 – Feb 2022**

Digi Outsource (Betway Division)

- Quality from the start – get involved in the user story definition process and write test scenarios upfront
- Bring a QA perspective to planning sessions and ensure test effort is taken into consideration
- Work close with developers to ensure that quality is considered, and they are creating the right kind of tests
- Work with product owners to ensure they sign off work items during the UAT phase
- Support - Assist with resolution and reproduction of user software problems
- Develop automated test within sprints as well as conversion of current manual tests
- Work within the ATDD framework and define items using BDD style syntax
- Ensure that bugs are treated with importance and try to limit the amount that make it live
- Drive Quality within the team and ensure definition of done is followed
- Establish and evolve formal QA processes, ensuring that the team is using industry-accepted best practices
- Oversee all aspects of quality assurance including establishing metrics, applying industry best practices, and developing new tools and processes to ensure quality goals are met

**Senior Integration Specialist****Feb 2020 – Apr 2021**

Derivco

- Troubleshoot and resolve issues related to the installation and configuration of software on integration environments.
- Ensure relevant software is updated and configured correctly on integration environments.
- Analyze and review 'setup and config' defects where required.
- Work with stakeholders to setup integration environments to agreed specification.
- Giving advice where needed on how to resolve integration issues.
- Provide technical help to our stakeholders and offer technical solutions to their queries.
- Ability to understand gaming ecosystem from start to finish.
- Identify automation opportunities and improvements for current automation.
- Ensure all documentation is maintained to organizational standards.
- Handle work request communication between departments where necessary.
- Provide feedback to customers and stakeholders on project milestones, successes, and issues.
- Agree to technical coaching strategy with team leadership and play an active role in coaching.

**Technical Lead/ Programme QA Champion****Nov 2018 – Feb 2020**

DOS (Digi Outsource)

- Management of the technical execution of the solution
- Focus is the integrity of the systems with regards to quality, stability and scalability
- Owns the construction and delivery process of system test automation
- Liaison between teams and other departments as necessary. Work with cross-functional team for requirements that need other team's involvement
- Foster relations with other teams (DBA/DevOps/dependent DEV teams) to ensure smooth execution
- Technical guidance and mentoring of Testers
- Ensure that automation - and load and performance testing are performed and documented for all components

**Duties to HOD**

- Assist the HOD in the selection of new recruits
- Assist with on boarding process for new recruits by creating exercises and/or on-boarding project as well as overseeing the team's technical knowledge base
- Report test coverage to the HOD and Product Owner to be added to the backlog and prioritized accordingly
- Ensuring test automation items are addressed when components are worked on
- Assist with work effort requirements in order to determine accurate timelines for projects

**QA Automation Engineer****Sept 2017 – Nov 2018**

DOS

- Working diligently with QA, Development & Dev Ops Teams to implement and maintain effective manual and automated testing frameworks for assigned development portfolios.
- Engineering strategic Automation Solutions, which includes providing Development & Dev Ops Teams with architectural guidance and support on how to best use automation to reduce the time needed for manual testing and for continuous health monitoring of applications.
- Review system architecture to determine appropriate test points.
- Proactively raise questions and seek resolution of outstanding clarifications required for automation.
- Setup, execution and maintenance of Automated Test Strategies used for monitoring and regression of system components potentially affected by system changes.
- Record and investigate defects/failures regarding product performance, specifications and reliability.
- Escalate potential quality issues to line management.

**Quality Assurance Technical Tester****2016 – 2017**

DOS

- Assist QA Lead to design and implement appropriate QA methodologies for the testing of in-house custom software and systems before they are put into production
- Measure and monitor in-house production software systems to ensure optimal performance 24/7/365
- Create and manage the Software Support function, with the specific aim of ensuring prompt resolution of bugs found in custom production systems
- Create and manage the R&D function, whereby QA and SS developers are given the freedom to explore any and all technologies and systems that may be of future technical and commercial value to the business
- Work closely with other developers to optimize overall development methodologies and systems
- Responsible for planning, development, execution and management reporting of end-to-end scenarios across businesses.
- Functioning within a dynamic Scrum environment that requires vigilance to deadlines, traceability and teamwork.
- Work with developers to translate business requirements and functional specifications into test plans and test scripts.
- Develop test plans, test scripts, and conditions to match business requirements.
- Execute test scripts, strong manual testing of system/web functionality, to ensure proper operation and identify and document gaps in quality.

#### **Product Support Analyst**

**Oct 2015 – Oct 2016**

##### **DOS**

- Provide support to the PO in conducting their duties.
- Work very closely with PO
- Required to have current knowledge of the status of projects and BAU within the team.
- Gathering requirements, project documentation, and the translation of requirements for software development teams ensuring documentation standards
- Assist PO in cultivating Agile Process and make sure everybody in the team adheres to it
- Communicate any impediment or update with the PO.
- Assisting the PO daily making sure the team is on track for delivery.
- Minutes distribution to include all meeting invitees
- Conducting a weekly sanity check on TFS for the following:
- Logging BAU items in TFS and communicate with the team.
- Making sure the process is followed within the team and TFS is up to date.
- Schedule planning meeting for each and every new feature required.
- Responsible for writing the meeting minutes and for communicating to the PO and tech team and business.

#### **Quality Assurance Technical Tester**

**22 Sept 2014 – Oct 2015**

##### **DOS**

- Assist QA Lead to design and implement appropriate QA methodologies for the testing of in-house custom software and systems before they are put into production
- Measure and monitor in-house production software systems to ensure optimal performance 24/7/365
- Create and manage the Software Support function, with the specific aim of ensuring prompt resolution of bugs found in custom production systems
- Create and manage the R&D function, whereby QA and SS developers are given the freedom to explore any and all technologies and systems that may be of future technical and commercial value to the business
- Work closely with other developers to optimize overall development methodologies and systems
- Responsible for planning, development, execution and management reporting of end-to-end scenarios across businesses.
- Functioning within a dynamic Scrum environment that requires vigilance to deadlines, traceability and teamwork.
- Work with developers to translate business requirements and functional specifications into test plans and test scripts.
- Develop test plans, test scripts, and conditions to match business requirements.
- Execute test scripts, strong manual testing of system/web functionality, to ensure proper operation and identify and document gaps in quality.
- Debug and troubleshoot system functionality issues. Report and track issues identified to resolution

#### **Technical Training Facilitator**

**1 Mar 2013 – 22 Sept 2014**

##### **DOS**

##### **TRAINING:**

- Training Needs Analysis
- Conduct Training Needs Analysis;
- Define the skill-set required to perform different roles;
- Analysis of learners and learning needs to reveal the key elements of learning required to achieve defined outcomes. The learning outcomes should be confirmed with stakeholders.
- Training Design and Development
- Design Outcome based learning programmes appropriate to the skills needed;
- Developing an appropriate mix of formal and informal development activities;
- Ensure the learning environment and resources support learner needs;
- Design course materials and other training documents;
- Design & develop e-Learning using various available technologies.

- Facilitate learning using a variety of given methodologies;
- Facilitate New Starter Training, W.A.T sessions, remediation training, intermediate to advance training, presentations, refresher training and individual coaching interventions;

#### **COACHING:**

- Live Coaching on the floor
- In the moment coaching
- Feedback sessions on Live contacts reviewed [Not older than 1 day]
- Address problem areas highlighted by QA Scorecards
- Deliver feedback to Host's
- Monitor and track improvement
- Capturing and reporting on findings from Live Coaching
- Track trends based on reporting
- KPI to incorporate number of live coaching and feedback per host in team

#### **Contact Centre TL**

**2008 to 2013**

##### **Digital Outsource Services (DOS)**

- Distribution of Tasks
- Maintaining Service Levels
- Dealing/ Resolution of High-Level Escalations
- Identifying and Resolving Technical Errors (Back Office & Software Product)
- Formulating and Submissions of Shift Reports
- Monitoring and Managing of all Staff Compliments on shift (15 – 20)

##### **Senior management experience**

- Assisting with Performance Appraisals (Probation & Quarterly)
- Reporting and Analysis
- Assisting with General Day to Day Management
- Reviewing and Reporting on Locked Accounts
- Formulating Training Documents, Scheduling and Facilitating Required Training (Independently Managing the Project)

#### **CSR/ 2nd In Charge/ Part of Process and Procedures**

**2008**

##### **The Car Phone Warehouse**

- Taking Contacts
- Resolving Highly Technical Queries
- Dealing with escalations

#### **CSR (Collections & Customer Service)/ Part Time TL**

**2005 - 2007**

##### **Truworths**

- Taking of contacts involving interest calculations & balance corrections
- Handling of Escalations and General Team Management during public holidays and weekends
- Assist with 'Refresher' training.

#### **EDUCATION**

##### **Customer Relationship Management for Contact Centre Management – NQF Level 6 (Unisa)**

**Jan 2012 – June 2012**

##### **Unisa**

- Customer Relationship Management (CRM) - Identifying the Target Market
- Customer Relationship Management (CRM) – Contact Centre Management

##### **Customer Service Psychology with Dr Brian Jude**

**1st June 2011**

##### **Dr Brian Jude and Associates**

- Customer Care, Evaluating Results, Commitment to quality and service, Retaining Customers, Listening Skills, Developing Rapport with Customers, Company Mission Statements, Improving Internal Motivation, Handling Irate Customers

##### **Customer Service Excellence**

**November 2012**

##### **Apsol**

- Certificate to be obtained from HR (Speak Up Business Partners)

##### **National Certificate: Contact Centre Support**

**November 2009**

##### **Seta Services**

##### **National Certificate: Contact Centre Support**

**November 2009**

##### **Seta Services**

##### **Wining over your Stress Levels**

**(2009)**

##### **Winning in Conflict**

**(2009)**

##### **Winning over your customers**

**(2009)**

##### **Pit boss (TL) development program**

**(2009)**

##### **DOS Internal Courses**
